Professional Experience

Genpact, Hyderabad

Oct 2025 – Present

Process Associate

- Managed high-volume operational tasks while consistently meeting quality, productivity, and turnaround time targets in a fast-paced environment.
- Analyzed operational data using Microsoft Excel (Pivot Tables and VLOOKUP) to prepare reports and support business decisions.
- Collaborated with cross-functional teams to resolve operational issues, improve workflows, and ensure timely completion of assigned tasks.
- Utilized AI tools and internal systems to streamline documentation, summarize findings, and improve reporting efficiency.

24/7 Intouch CX, Hyderabad

Jan 2025 – Jul 2025

Associate

- Delivered customer support while maintaining high service standards and consistently achieving productivity and quality targets.
- Prepared Excel-based reports to monitor KPIs, operational performance, and daily business activities.
- Coordinated with internal teams to resolve customer concerns, document recurring issues, and support continuous process improvements.
- Worked with CRM applications and internal knowledge bases to provide accurate resolutions while ensuring a positive customer experience.

Projects

Project Portfolio Management Dashboard

Microsoft Excel, Power BI, SQL

- Developed a centralized dashboard to monitor project milestones, timelines, task progress, and overall project health, providing a clear view of multiple projects in one place.
- Cleaned, validated, and integrated project data using SQL and Microsoft Excel to improve reporting accuracy and maintain consistency across project updates.
- Built interactive Power BI dashboards to track key performance indicators, resource utilization, project risks, and pending action items, enabling better project visibility.
- Automated weekly project reporting using Excel and Power BI, allowing project managers and stakeholders to review progress efficiently and make informed decisions.

Business Performance Analytics Dashboard

Tableau, SQL, Microsoft Excel

- Designed an interactive business dashboard to analyze operational performance, monitor KPIs, and identify trends that supported business planning and decision-making.
- Collected, cleaned, and transformed data from multiple sources using SQL and Microsoft Excel before creating visual reports and dashboards.
- Performed trend analysis on business data to identify performance gaps, improve reporting accuracy, and provide actionable insights for stakeholders.
- Developed easy-to-understand dashboards and summary reports that simplified complex datasets and helped management monitor overall business performance.
